AWM

WINDOWS AND DOORS

At AWM Windows and Doors we only manufacture and supply the highest quality window systems available. All of our window frame systems are manufactured in our Doncaster based fabrication plant from Selecta Systems uPVC profile.

Our 40-page trade price list includes our full range of uPVC, Aluminium and composite products:

- uPVC Casement, French, Tilt and Turn & Sash Windows
- uPVC Single doors, Inline Sliding Patio & French Doors
- uPVC Bifold Doors
- Composite Doors
- Aluminium Roof Lanterns
- Aluminium Bifolding Doors

We believe in offering a market lead product range rather than a product lead range, therefore our products are not off the shelf or standard. If you don't see what you're looking for then simply ask us.

We trust that you find this price book useful and if you require any more information or quotations please do not hesitate to contact our team who are always happy to help.

You can also now view and order our entire product range via our online store at **www.awmwindowsanddoors.co.uk** or just scan the QR code using any smart phone. **NEW** - Lookout for the QR code on each page to go to that item directly.

All information correct at the time of printing. Version: 2023:04

Please call for bespoke prices or email us at enquiries@awmwindowsanddoors.co.uk

Nationwide Delivery Information

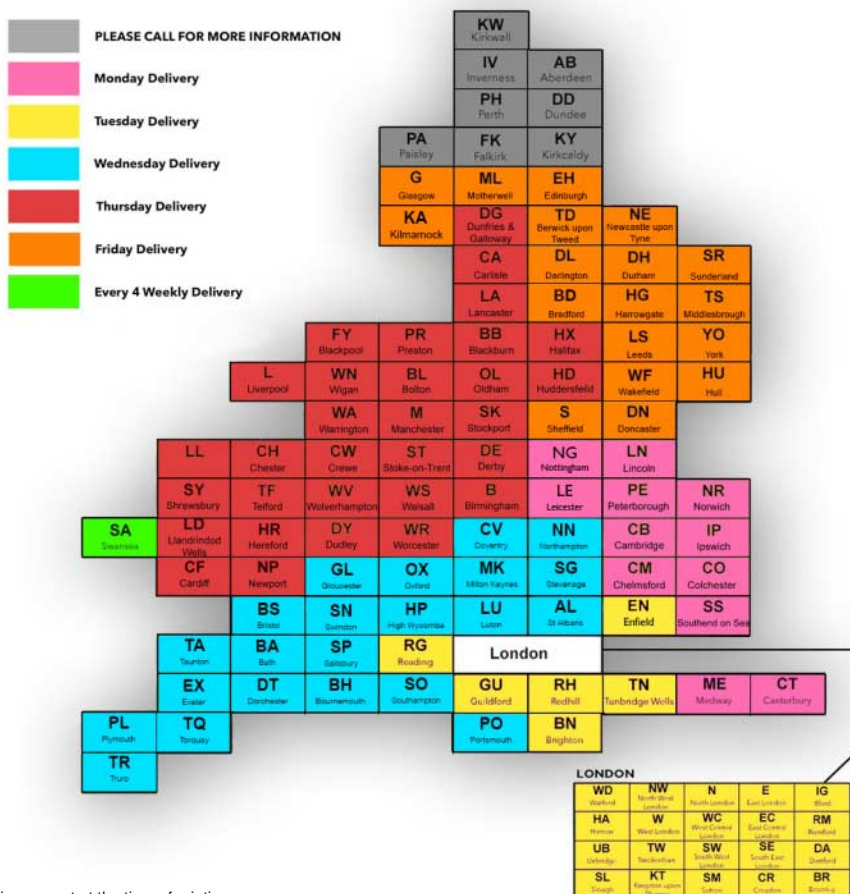

Our fleet of vehicles are especially converted and designed to carry Windows, Doors and Glass by using a special racking system meaning your items will arrive safe and sound.

We have a dedicated transport manager who, once your order is placed immediately books your delivery slot and ensures that your delivery happens on time.

We cover all the UK Mainland on a weekly basis. Please see the map below as to when we are in your area and when you could expect your delivery.

If you have any questions regarding your delivery please call our transport manager on 01302 742111 option 3.

We now offer detailed delivery information on every order. You will receive a notification in advance of your delivery confirming the delivery schedule the day before your delivery, you will then receive further notification on the day of your delivery with an estimated 2 hour timeslot. Detailed Tracking information will be available when the driver is within 60 minutes of your location.

colourfoil

BY SELECTA

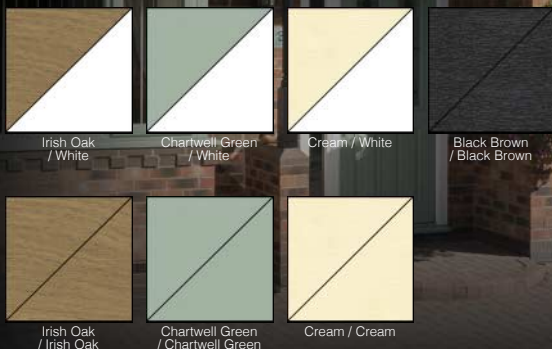

We offer a wide range of colour options which have been put together make the perfect colour palette for any home. There are 8 different colourfoil finishes, which are available on one or both sides and therefore giving you 16 colour options.

With modern and traditional shades complimented with authentic wood like finishes, colourfoil adds that finishing touch to any property. Our colour collections provide you with a fantastic palette of colour options for your home, whatever the style, period or location.

Standard Colours

Premium Colours

PLEASE NOTE: Colours are for illustration purposes only and may vary in the print process

Composite Decking Range

Composite Decking

We now stock Composite Decking and accessories in a full range of colours

Our durable, reversible, slip resistant decking boards are available in a range of modern and natural colours, each with a contemporary grooved finish on one side and beautiful natural wood texture on the other or small grooved to the face and large grooved on the reverse. Weather-resistant and ultra-low maintenance – unlike classic timber decking they won't warp, crack, splinter or require annual sanding, staining or sealing. Fixed in position with a hidden fastening system for a clean and professional finish.

French Windows

French windows are ideal for achieving a fire escape in small windows where conventional casement windows do not provide a wide enough opening.

A photograph of a bathroom interior. In the foreground, a large, curved copper bathtub is visible. Behind it, a white uPVC sash window with four panes is set into a dark blue wall. To the left of the window, a large green fern plant sits on a dark surface. On the windowsill, there are two small decorative items. The overall lighting is soft and natural, coming from the window.

Sash Windows

Vertical sliders are a traditional style of window. Commonly found in older properties, they are usually manufactured from timber. This elegant type of window is a popular replacement in period houses, its design giving your home a sophisticated charm and style that you won't achieve from a standard casement window. Real timber windows can be expensive so homeowners look to more affordable solutions such as uPVC.

uPVC sash windows are thermally efficient and environmentally friendly which imitate the charm of a classic timber vertical slider, but have all the benefits of a modern uPVC system, giving you the best of both worlds.

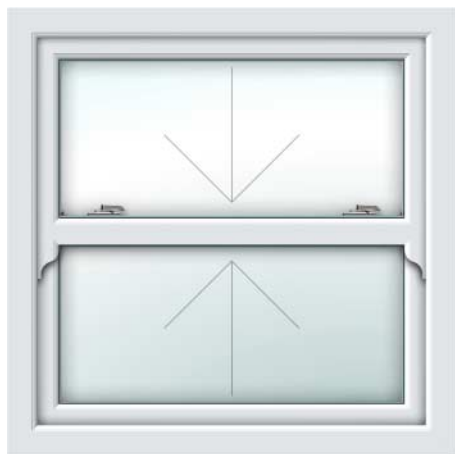

Whether you live in an older property or a more modern home, uPVC sash windows are a cost-effective solution for replacing like for like replacement or as an alternative to other styles. We can even install splay and 90° bay styles. Choose from a range of colour and hardware options to complete your window and create a look that fits in perfectly with your home.

Easifold Doors

ORDER ONLINE
Scan the code below with any smartphone

Panoramic door options have become a very popular choice with homeowners over the last few years as they add that something extra to their homes.

A revolutionary and innovative option to the bi-fold door has been developed in EASi-FOLD giving you a far more versatile panoramic door.

EASi-FOLD Doors, appropriately named because of the simplicity of operation, are a multi-pane set of doors with individually opening sashes with no visible hardware, only a simple handle on the master door.

Having independently opening and sliding sashes enables easier handling when opening and closing, as each sash opens individually and glides effortlessly, pivots and folds into place with ease and little force.

The Advance 70 EASi-FOLD Door is the most user friendly panoramic door option available.

Width (mm)	Height (mm)	White	Colour / White	Full Colour	Internal Blinds

High Quality Flat Roof Glass

The 'Thermolight' flat rooflight comes with a high efficiency energy rated glazing, keeping you nice and warm in the winter and suitably cool in the summer. Bring light in to dark spaces without compromising on energy efficiency. Great for use in stair wells, ground floor extensions etc.

Top Outer Pane - 6mm softcoat toughened with a 100mm UV Printed black border finished with Beveled Edges

Cavity - 18mm spacer bar with argon gas filling

Inner Bottom Pane - 4mm softcoat toughened

Overall 1.2 u value

MADE TO BS EN 12150 STANDARD

Our thermolight rooflight has a 100mm overhang on all 4 sides to fully cover and overhang the top face of the timber kerb up stand (not included). Your chosen roof covering (Rubber, GRP or felt) should be applied to your roof, up and over the top face of your timber kerb up stand prior to fitting the rooflight. Once completed you can commence fitting. Apply suitable glazing silicone to the top of the timber kerb up stand without compromise. Bed down your thermolight rooflight on the silicone beads with equal pressure ensuring no air bubbles are left.

Aluminium Roof Lantern Stratus Lantern

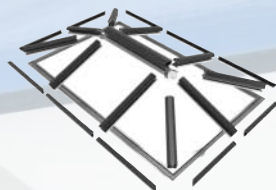

The purpose designed Stratus aluminium lantern roof system is discreet yet stylish. Stratus allows light to flood into your home's interior, the ideal modern lantern solution, coupling sleek contemporary looks with truly outstanding performance.

Designed from the ground up around an innovative thermally broken system, it provides excellent thermal performance - keeping cool in the summer and warm in the winter - while delivering the architectural refinement you'd expect of a high end aluminium lantern system.

Whether you are building a new kitchen-diner extension or replacing an existing lantern roof, Stratus will help redefine your home, creating light and airy spaces for you to enjoy.

Every element of the Stratus lantern has been designed to be exceptional. From the low profile 20° pitch that allows us to use purpose designed cappings that keep sightlines to a minimum - and your view of the sky maximised - to the discreet black finish of our perimeter beam that ensures if you view the lantern from above all you'll see is glass and a discreet shadow line.

uPVC

Roof Lantern

A uPVC roof lantern provides a stunning focal point for any kitchen, living room or dining room. Designed to draw plenty of daylight into your room with its 20° pitch, a uPVC lantern makes your new room bright and airy. Thanks to a strong ridge the lantern has less bars than other Lanterns and with a host of clip-on features there are no visible fixings. Put simply, this means that the lantern looks both neat and stylish.

uPVC lanterns are packed with thermal features to avoid condensation build-up. From the thermal rider rail to the thermal clips, these features combine to ensure excellent performance, especially important in a kitchen where heat levels can change quickly.

Made to measure, the lanterns are perfect for any flat roof extension or orangery and are available in uPVC (grey or white).
